CounterWatch™ Sentry

AUTOMATIC PET SPRAY DETERRENT SYSTEM

Keeps Cats Off Counters and Table Areas Forever

Instructions and Training Guide

Thank you for choosing CounterWatch™

We would like to congratulate you on having purchased the most effective and lowest use cost Automatic Spray Deterrent System designed exclusively for cats. Our goal is to provide you with a low cost effective training solution, that is easy to use and extremely versatile.

Product Description

CounterWatch™ is a High-Tech Cat Deterrent Training Aid to deter cats in staying off of counters, table tops, away from doorways and other areas. Product has 5 user modes (which keeps the cat from assimilating to the deterrent event and aids in rapid training).

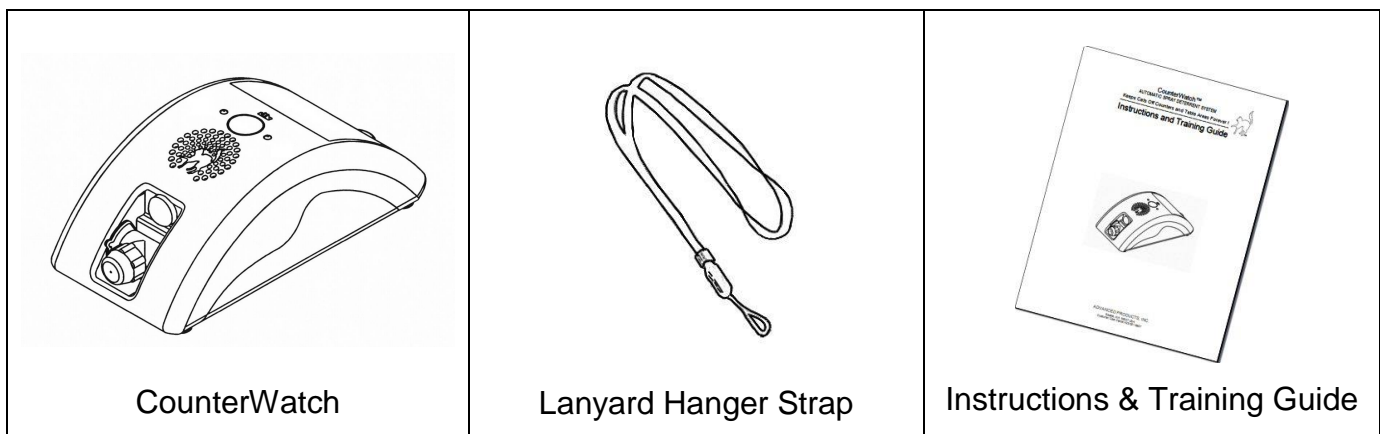

Spray deterrent is triggered by a Infrared Sensor that will sense and then deter the most stubborn cat from your areas and surfaces. Product utilizes a user settable deterrent program modes controlled by a microcontroller and powered by standard (4) AA batteries.

Prevent your Cat from:

- Jumping on Counters, Tables, Furniture etc.
- Soiling or Spraying Areas
- Entering Areas or Rooms
- Climbing Drapes and Other Vertical Surfaces
- Digging and Destroying House Plants
- Escaping from Entry and Exit Doorways

Package Contents

- (1) CounterWatch Training and Deterrent Device
- (1) Lanyard Hanger Strap
- (1) Instructions and Training Guide

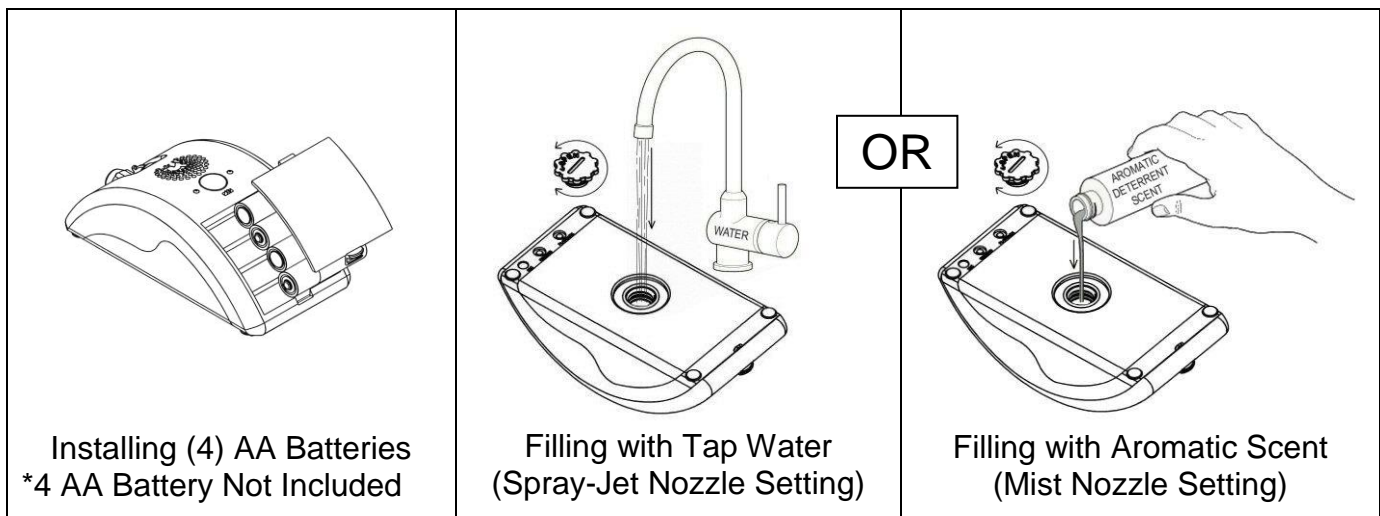

CounterWatch™ Features

- Easy To Use and Setup
- Quick One Touch Alarm/Disarm On-Off Button
- Armed & Low Battery LED Indicators
- Large Easily Refillable Liquid Spray Deterrent Reservoir
- Automatic Sensor Senses and Deters/Repels Cats up to 60"/1.5M Away
- 3 Easy-To-Use Deterrent Training Modes (Spray Only; Spray & Sound/Voice; Sound/Voice Only). Record Sound up to 10 Seconds.
- Direct or Passive Spray Deterrent Modes available. Direct Deterrent using a Water Spray-Jet for Direct Contact with Pet, or fill with CounterWatch™ Organic Citrus Animal Deterrent for a Mist-Spray for Passive Non-Contact with Pet.
- Adjustable Trajectory Sprayer (Up-Down) and Spray Nozzle (Mist-Spray-Jet)

Setup

- 1) Remove Battery Cover, Install Batteries (4) AA Batteries as shown, Replace Battery Cover.
- 2) Remove Spray Reservoir Fill Plug from bottom of CounterWatch™, Fill with Tap Water or your favorite Liquid Spray Deterrent (non-viscous), Replace Fill Plug.
- 3) Record a customized training or deterrent message, or sound to be played when sensor is triggered. Simply turn on CounterWatch™, allow initial Test Spray to finish, avoid sensor path and locate and press the Record Button, and record up to 10 seconds your voice, favorite verbal scolding or sound. Press the Playback Button to hear your recording. Just for the fun of it there are thousands of royalty free sounds online (<http://www.freesound.org/>) that you can record on to CounterWatch™ to deter your pet.
- 4) To hang vertically, pull out Vertical Hanger Loop and small loop end of Lanyard through the hanger loop and then back through the lanyard strap handle.

Operation

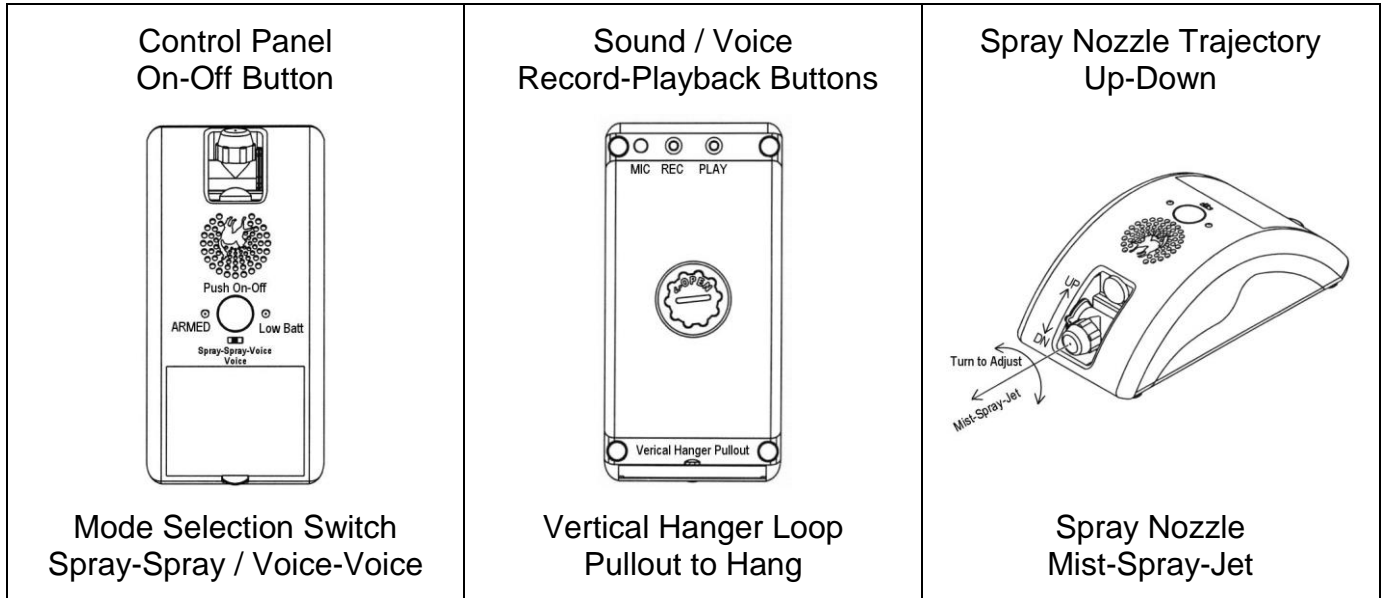

- Press 'Power On-Off' button, 'ARMED' LED will illuminate Blue when On, InfraRed Sensor will then calibrate and Spray Deterrent System will initiate Test Spray.
- Observe 'BATTERY' LED, this is the Low Battery Indicator (4 Stage).
Full Charge = No Red LED illumination 75% Charge = Red LED begins to glow
50% Charge = Red LED slowly flashes 25% Charge Red LED flashes rapidly

- Select from 3 Easy-To-Use Deterrent Training Modes (Spray Only; Sound/Voice Only; Spray & Sound/Voice) via Mode Selection Switch.
- Adjust Spray Nozzle to desired Mist-Spray-Jet and trajectory, Turn Clockwise for Mist and Counter Clockwise for Jet. Use Mist for Aromatic Scent Deterrents.
- Place CounterWatch™ in an area that you wish to deter your pet from entering. Please see 'Training Tips' and 'Precaution' sections below.

Suggested Use Areas

- Kitchen and Bathroom Countertops - Horizontal Orientation
- Tabletops and Desktops - Horizontal Orientation
- Furniture Such As Couches And Loveseats - Horizontal Orientation
- Entry and Exit Doorways - Horizontal or Vertical Orientation
- Draperies, Blinds and Vertical Climbing Surfaces - Vertical Orientation
- Plants and Potted Plants - Horizontal or Vertical Orientation
- Garaged Car/Vehicle Surfaces (hood, trunk and roof) - Horizontal Orientation
- Indoor Problem Areas Where Pet Eliminates - Horizontal-Vertical Orientation

Training and Deterrent Tips

Observe your cat's frequently traveled paths or areas that you would like to deter your pet from advancing in, walking across, climbing on, lounging or loitering. For maximum long term deterrent affect, it is best to place CounterWatch™ in a way it is not visible to your cat.

Position CounterWatch™ to sense cat's path of travel. Direct the sensor and spray, preferably across the path of pet's travel to avoid unnecessarily wetting surfaces, objects or materials.

Suggested Training Methods and Deterrent Mode Settings				
Method - Mode	Fluid	Nozzle	Selection Switch	Notes
Training Method 1	Scent	Mist	Spray & Sound/Voice	Step 1 - Frequent Offenders
Training Method 2	-	-	Sound/Voice	Step 2 - Casual Offenders
Deterrent Mode 1	Water	Spray-Jet	Spray & Sound/Voice	Active - Direct Pet Contact
Deterrent Mode 2	Scent	Mist	Spray & Sound/Voice	Passive - No Pet Contact

Precautions

CounterWatch™ is a Automatic Spray Deterrent System, which is designed to spray tap water or any non-viscous liquid. Evaluate for use if the desired deterrent area will be adversely affected by sprayed water or liquid (do not use on/near unfinished wood surfaces, electronic components or delicate surfaces).

- Prevent water and fluids from entering Battery Compartment, Microphone, On-Off Switch, Selector Switch, and Speaker Vent and damaging product and voiding warranty.
- Generally speaking, spraying simple tap water is not harmful to most surfaces, evaluate before use. Any Liquid Pet Deterrent should always be tested on a small test area first.
- Many Liquid Pet Deterrents on the market contain strong concentrations of citrus, and or other chemicals that may degrade, discolor or ruin certain objects or materials. Always test your deterrent area with the spray liquid first and evaluate for use.

Troubleshooting

Fails to Turn On
Fails to Spray

Make sure batteries are inserted correctly and are charged.
Make sure CounterWatch™ is turned on. Make sure Spray Reservoir contains spray fluid. Make sure Spray Nozzle is not turned in to maximum clockwise position.

Spray is Weak

Adjust Spray Nozzle counter-clockwise until desired spray pattern is achieved.

Fails To Sense Cat

Adjust placement of CounterWatch™ making sure that Sensor is pointed across the path of cat's travel (must be within 1.5 meter or 5' of path). You may also elevate CounterWatch™ by placing it on a another object to raise the Sensor Detection Height to more match the cats main body (and not at leg level) enhancing Sensor's Detection, though typically unnecessary.

Leakage from Fill Plug

Make sure the Fill Plug O-Ring Seal is present and not damaged. Check that the Fill Plug is properly tightened (snug, but not over-tightened).

Replacement Parts and Accessories

Fill Plug O-Ring (pkg. of 2)

Replace Fill Plug O-Ring if it becomes lost or damaged.

Lanyard Hanger Strap

Used to attach to Vertical Hanger Loop on bottom of CounterWatch™ to hang in a vertical position.

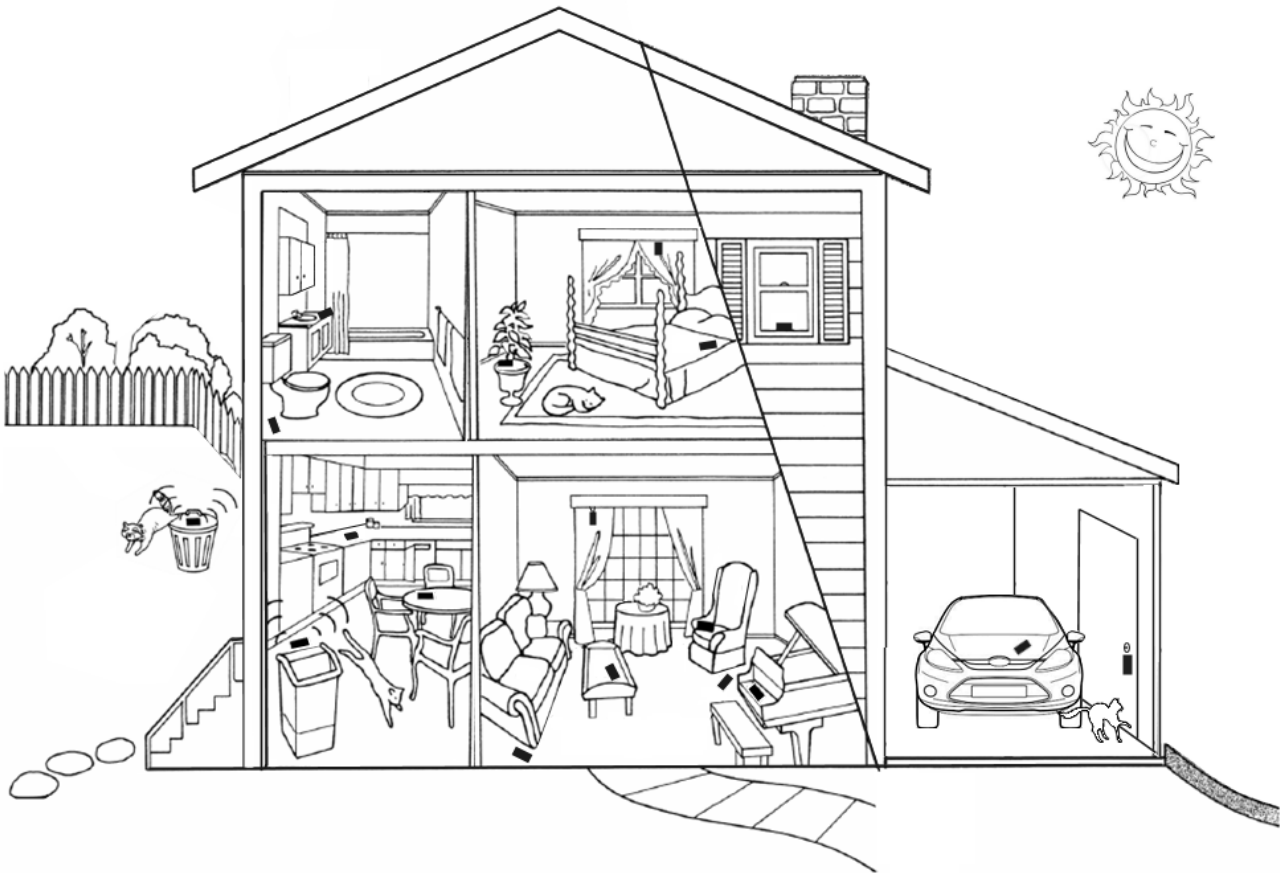

Citrus Liquid Pet Deterrent

Cat's typically hate Citrus Scents and can be a great deterrent. Used as a substitute for Tap Water. Use caution when using this product as it can degrade, discolor or ruin certain objects or materials.

Warranty Limited Liability
